

You can mount this device many ways. Here are 3 ways we found that would get you dropping bombs in no time.

Mounting with double side tape

- a. You need to locate where you want to install your bomb drop. Use the supplied template to help you locate the best location. You will need to cut a hole for the servo to drop into the location and run the servo wire to your receiver.
- b. After fitting your bomb drop into the location and you test everything, be sure to clean both surfaces before securing.
- c. Apply double sided tape to the bottom of the bomb drop lower plate. Remove the tape cover from the 2-sided tape and press down and hold for a few seconds. After you make sure it is secure, hook up the servo wire to any open channel on your radio. Assign a switch and test your bomb drop.
- d. To secure your Adam bomb to the drop device, put your switch in the release position, insert the bomb and flip your switch to the arm position. You are now ready to go.

Mounting with hot glue or silicone adhesive

- a. Refer to step A & B above
- b. Apply hot glue or silicone adhesive to the bottom of the bomb drop lower plate. press down and hold for a few seconds. (if you are using a Silicone adhesive, be sure to go by the instructions of the product you are using) After you make sure it is secure, hook up the servo wire to any open channel on your radio. Assign a switch and test your bomb drop.
- c. To secure your Adam bomb to the drop device, put your switch in the release position, insert the bomb and flip your switch to the arm position. You are now ready to go.

Mounting with screws

- a. Refer to A&B above
- b. To install the device with screws, You will need to remove the 2 screws in the bomb release that secures the release to the case. This will allow you access to the three mounting holes.
- c. Screw down the bottom plate to your aircraft, slide on the servo cam and put the case back and bomb release back on and install the 2 screws you removed earlier.
- d. To secure your Adam bomb to the drop device, put your switch in the release position, insert the bomb and flip your switch to the arm position. You are now ready to go.
